**hydroo®**

HYDROO is present in all the European markets by means of a distribution network focused on the service and the valuation of the pumping business. HYDROO conceives, researches, develops, designs, industrializes, and manufactures a wide range of pumping solutions for the most demanding applications in industrial markets, irrigation, water supply and water treatment as well as in residential and commercial buildings. The values of operational excellence, experience, reliability, and passion for a well-done job guide the daily work of the Hydroo team together with our partners and distributors. The global challenges of water management require excellence in pumping technologies and a joint effort between designers, manufacturers, and pumping engineers. To meet the needs of the market in the more demanding installations Hydroo is firmly committed to manufacturing the best pumping equipment on the market following and sharing our values worldwide.

The Hydroo values are presented in 5 great concepts that we summarize in our motto Hy5, which are our principles and commitments:

# BE PUMPING PARTNERS

**Salt d'Espolla, Esponellà**  
(Pla de l'Estany county, Catalonia)

A spectacular waterfall, highly recommended to visit, but take into account that almost the whole year is dry and only appears after the rainy seasons. This is a fantastic place, very shady, with leafy vegetation and mossy rocks.

**Coordinates:**  
Longitude: 2.78415  
Latitude: 42.17378

## hymotion

Value proposal based on the reliability of products enhancing the quality, the development of efficient supply chains, the productivity with the love of craftsmen at every step of the manufacturing and production lines. We move with the commitment to improve pumping systems, make them more efficient, more reliable, more digitized, more at the service of the human development.

## hylite

Contribution to preservation of the environment and to sustainability. We reduce the environmental impact and footprint of carbon. We contribute to the development of the circular economy. Our team stand out for the highest standards of energy efficiency.

## hyficient

The use of the most advanced analytical, development and simulation tools allows us to optimize our R&D teamwork results. We maximize the study of materials, efficient hydraulics, mechanical improvements and the optimization of our motors up to 200 kW. The results are robust, reliable, flexible, adjustable, multipurpose, and user-friendly pumping equipment.

## hynovative

Commitment to implementation of the innovation process as strategic pillar of the company. Transfer new ideas to realities that evolve pumping industry and internalize the process in each job position to offer market improvements.

## hyliance

We are the factory of our customers. Without solution of continuity between the value chain starting in the components production plants and ending with amortization of the pumping equipment operating at full performance for years and giving satisfaction to distributors, project engineers and pumping systems managers. We make real our catchphrase **Be Pumping Partners**.

# HZ

## Polymeric end suction pump

### Description

HZ pump has one impeller, axial suction and radical discharge.

Simple structure, shaft is directly connected with impeller.

Easy for pipe works, inlet and outlet are connected by standard flanges.

Wet parts are made in polymeric fluorine, accessories are made of cast iron (GG20).

### Performance range

Flow range: 2.2 ~ 60 m<sup>3</sup>/h

Head: 16 ~ 52 m

Temperature: -20 °C ~ +120 °C

Speed: 2900 rpm

Power: up to 18,5 kW

### Standard material

PVDF = Polyvinylidene fluoride

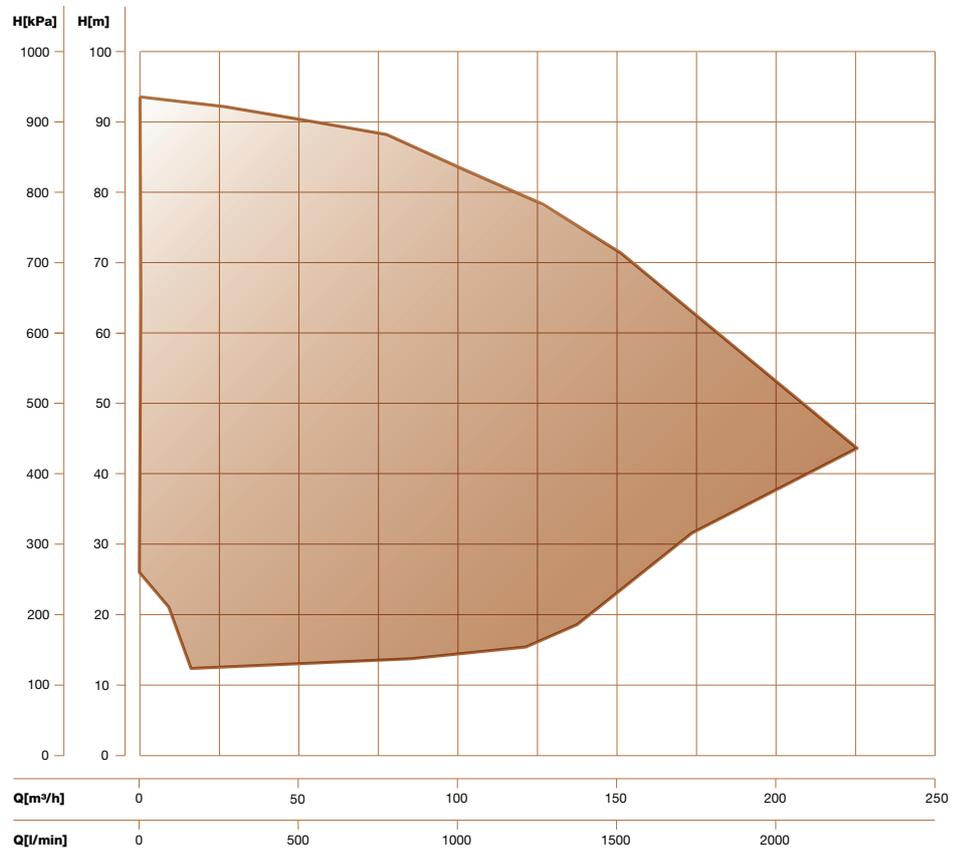

FEP= Fluorinated ethylene propylene GG20.

### Applications

- Alkali & acid production
- Metal smelting industry
- Chemical synthesis
- Paper-making industry
- Textile dyeing and finishing systems
- Pickling processes in electroplating
- Other corrosive liquids transferring

### Performance ranges

## Definition of model

**HZ** **L** **50** - **32** - **160** - **F46** **5,5** **T** **4069** **5** **2** **IE3**

- | Motor efficiency
- | Number of poles
- | 5: 50 Hz  
6: 60 Hz
- | Rated voltage (x10) (V)
- | T: Three phases  
S: Single phase
- | Power P2 (kW)
- | F26: Hydraulic part in PVDF  
F46: Hydraulic part in FEP
- | Impeller nominal diameter (mm)
- | Impeller diameter (mm)
- | Suction diameter (mm)
- | Ø: Monobloc  
L: Extended shaft
- | Single-stage centrifugal pump in Flourin

### Structure features

- HZ pump has one impeller, axial suction and radical discharge.
- Simple structure, shaft is directly connected with impeller.
- Easy for pipe works, inlet and outlet are connected by standard flanges.
- Wet parts are made of PVDF, FEP, accessories are made of cast iron (GG20).

### Typical application

- Any concentration of acid alkali, salty solution, strong oxidants, organic solvent etc. Strongly corrosive medium.
- Petrol, chemical, pesticide, acid cleaning, dying, paper making, galvanization, etc.

### Operation conditions

- Thin medium not containing grain or fiber.
- Medium temperature: -20 °C - 120 °C
- Medium density: Max 1.35 x 103 kg/m<sup>3</sup>
- Ambient temperature: Max +40°C
- Altitude: Max 1000 m
- Pressure: Max 10 bar

### Motor

- TEFC motor, 2 pole
- Protection class: IP 55
- Insulation level: CLASS F
- Standard voltage: 3x380V

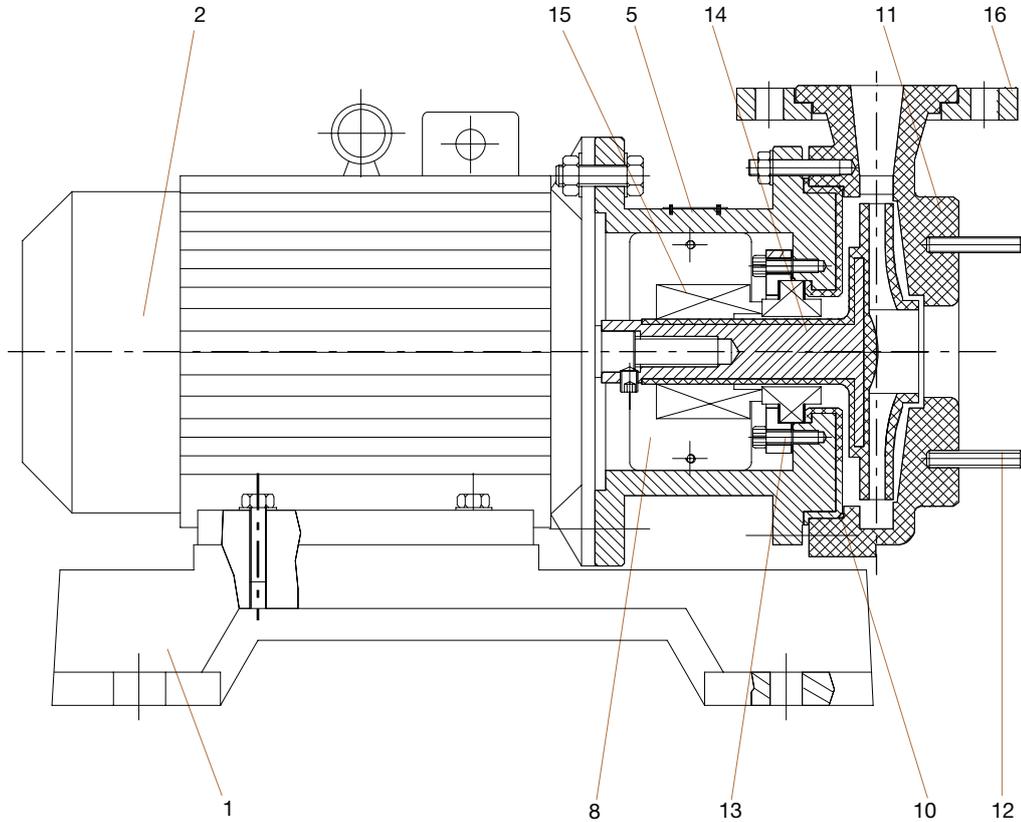

### Installation requirements

- Curves tolerance is according to 1509906, Annex A;
- All curves are based on the measured value of constant motor speed 2900 rpm, 3 x 380V.
- The measurements were made with airless water at temperature of 20 °C. The curves apply to a kinematic viscosity of 1mm<sup>2</sup>/s (1 cst)
- It is suggested to operate the pump in the scope of the bold curve, to prevent motor from overload.
- When pumping liquids with a density higher than that of the operation conditions, use motors with correspondingly higher outputs.

### Performance curve

- Q/H: means the curve of the flow and head at the nominal rotating speed.
- Power curve: P2 means the pump input power, if the medium density is 1 x 103kg/m<sup>3</sup>.
- Efficient curve: Eta means the pump efficiency.
- Installation conditions
- When installation, please make sure the pump would not be effected by the pipeline force when pump operation.
- The pump should be strongly fixed on the horizontal base.
- In order to make motor work well, pump should be installed on the frozen free and ventilate place.
- The electric protection devices should protect pump from being damaged by phase lack, unstable voltage, electric leakage, overload.

## FEP compatibility list

|  |   |   |
|--|---|---|
| Acetic acid; benzene   | Sulfuric Acid +20% ( $\geq 80$ °C)<br>Smoke sulfate | Titanium tetrathloride;<br>zinc chloride    |
| Arsenate; boric acid   | Smoke sulfate                                       | Ferric trichloride;<br>carbon tetrachloride |
| Carbonate  | Sulfurous acid                                      | Salt solution; seawater                     |
| Fluoride acid  | Ammonium hydroxide,<br>potassium hydroxide          | Blue alum; NaHSO <sub>3</sub>               |
| Hypochlorite; wet chlorine                                   | Sodium hydroxide <20%                               | Sodium bicarbonate; soda                    |
| Chromic acid   | Sodium hydroxide <80%                               | Sodium hypochlorite                         |
| citric acid  | Calcium hydroxide                                   | Sodium chlorate; calcium chloride           |
| Toluene acid   | Acetic acid salt solution                           | Chromium sodium                             |
| Formic acid  | Ammonium nitrate;<br>barium nitrate                 | Al acetic                                   |
| Hydrochloric acid ( $\geq 65$ °C)                            | Sodium nitrate;<br>copper nitrate                   | Bromine                                     |
| Hydrofluoric acid;<br>fluorosilicic acid                     | Iron nitrate  | Glycerol                                    |
| Hydrogen peroxide;<br>lactic acid                            | Nitrate lead; silver nitrate                        | Pyridine                                    |
| Maleic acid; malic acid                                      | Aluminium sulfate,<br>ammonium sulfate              | Acetic (acid) anhydride                     |
| Mixed acid   | Ammonium sulfate +<br>sulfuric acid                 | Aniline dye; hydrochloride aniline          |
| Oleic acid   | Barium sulfate; sodium sulfate                      | Methane, ethane, propane                    |
| Oxalate acid   | Copper sulfate                                      | Nitrobenzene                                |
| Picric acid, stearic acid                                    | Copper sulfate +10%<br>sulfuric acid                | Tar and ammonia                             |
| Tartrate; Tannin   | Ferrum sulfate +10%<br>sulfuric Acid                | Toluene; SO <sub>3</sub>                    |
| Nitrate 5% to 10%  | Magnesium sulfate; zinc sulfate                     | Glycol; ethylene oxide                      |
| Nitric Acid <50%   | Ammonium; sodium                                    | Two-acetone;<br>dichloro-ethanol            |
| Concentrated nitric acid                                     | Chloride; barium chloride                           | Ethylene dichloride;<br>vinyl trichloride   |
| Nitric Acid +3.5%<br>hydrofluoric acid                       | Calcium chloride                                    | Formaldehyde                                |
| Phosphoric acid  | Aluminum trichloride                                | CS <sub>2</sub>                             |
| Phosphoric acid +2% sulfuric acid +1% Hydro-<br>fluoric acid | Potassium chloride                                  | Molten sulfur                               |
| Sulfuric acid <10%   | Sodium chloride; tin chloride                       | Sulphur dichloride                          |
| Sulfuric acid 10% to 75%                                     | Silver chloride,<br>magnesium chloride              | Molten sulfur                               |
| Sulfuric acid 75% to 98%<br>( $\geq 80$ °C)                  | Nickel chloride                                     |   |
