

Volumetric Stainless Flexible Impeller Pumps, are mostly suitable for the transfer of delicate, fragile and viscous medium, also with solid parts in suspension.

Features

- ✓ Immediate priming at a depth of up to 5 meter, even when running dry
- ✓ Flow reversibility
- ✓ Low speed motor, which ensures a gentle pumping action for delicate liquids
- ✓ Continuous and regular pumping action
- ✓ Capacity to handle viscous and solid-laden liquids
- ✓ High thickness steel (3/4mm) which ensures a higher mechanical and corrosion resistance, and therefore a longer life
- ✓ Monobloc pump casing casting for higher strength and a better seal
- ✓ The cleaning and replacement of the mechanical seal and of the impeller are incredibly simple as the pump can be taken apart with ease
- ✓ Flexible impeller made of entirely non-toxic synthetic rubber (Neoprene , NBR , EPDM) and resistant to different acids
- ✓ Mechanical seal made of INOX/GRAPHITE/ NBR/EPDM or Tungsten/Tungsten/NBR/EPDM

Technical data

Body Material	AISI 304L
Impeller :	CR , NBR , EPDM
Max. Capacity	4.5 m3/h
Max Head	25 mt
Max Temperature	90 C
Intake / delivery connections	1 1/4" BSP M - DN40 DIN 11851 on request
Motor	0.75 HP 380V3/50Hz / 900 rpm 1.0 HP 380V3/50Hz / 1400 rpm

The AD Flexible impeller pumps are widely used:

In the oenological field

Stemmed grapes, wine, must, e.t.

In food processing
Honey, yogurt, beer, fruit pulp and juice, glucose, brine, syrups, melted butter, liquid sugar, eggs in liquid form, tomato pulp e.t.c

In the chemical industry

Paint, ink, water based glues, rubber latex, glycerine, wax, emulsion starch, liquid for photograph process, industrial discharges, polyelectrolyte, detergents e.t.c

In cosmetics industry and in the production of pharmaceutical products

Cleaning lotion, cream, shampoo, liquid soap, e.t.c

Impeller made of non-toxic rubber

The impeller is made of synthetic rubber (Neoprene, EPDM, NBR) and is entirely non-toxic and resistant to several acids. Our impellers complies with the American FDA regulations related to the handling of food grade liquids

Pump casing formed as a single piece

All pump casings are constructed from high thickness stainless steel sheet metal, which ensures quality and long life. The pump casings undergo continuous quality controls of the welds and are internally and externally polished to ensure the highest level of hygiene

Mode of operation - Advantages

Basic pump characteristics

The Positive Displacement Flexible Impeller pumps, defuse the vane at the suction side. As a consequence, an intense vacuum is being created and we have the possibility for automatic suction from a depth of 6 m from a dry position. The vanes at the discharge will slightly bend, with the result being the medium to be transferred towards the exit. That way, we manage the smooth transfer of the medium at the exit without a pulse.

Self priming

Self priming of the product up to 6m, even from a dry starting point within a few seconds.

Reversible operation

The pump can work in both the 2 directions of operation with interchange of the flow of the liquid inside the network without a problem, as many times as we want with a simple interchange of the motor direction.

Suitable for the transfer of delicate and viscous liquids

Up to 75.000 cps, even with solid suspension, without any wear out or damage.

Smooth and steady pumping of the product without

pressure from the spikes (even flow rate is ideal for filling, dosing or filtration)

AD 30.1 spare part list

Pos	DESCRIPTION	MATERIAL
1	Flange	Stainless steel 304L
2	Pump casing	Stainless steel 304L
3	Impeller	CR , EPDM , NBR
4	Body seal ring	NBR , EPDM
5	Rear cap	Stainless steel 304L
7	Elastic ring	Steel
6+8	Mechanical seal	INOX/Graphite/NBR/EPDM or Tungsten/Tungsten NBR/EPDM
9	Compensation ring	Stainless Steel
10	Seeger ring	Steel
11	Electric motor	
12	Tie rod	Stainless steel
